

# Rack Mount Kit RMK2

## For assembly of two ½ U units into one 1 U unit

(Compatible with VERTO and PULSE8 AE)

Version: 1.0 / Date: October 7, 2025

Figure 1: Front view of both devices

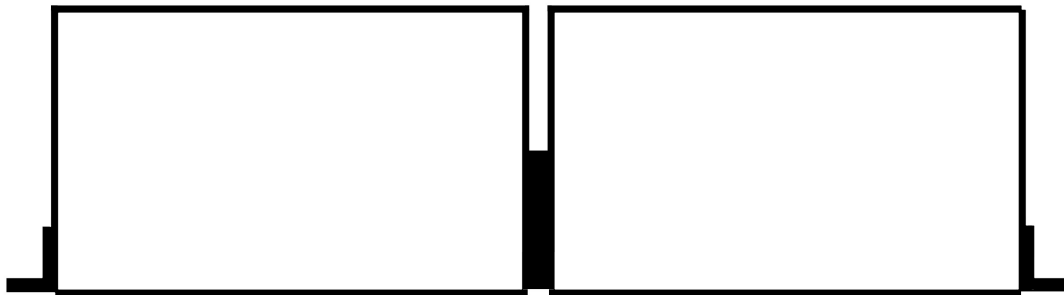

Figure 2: Top view of both devices

### Package Contents

Note: To protect internal components of the devices, do not use screws longer than the supplied ones during assembly!

Description	Quantity
Aluminum rack ears	2
Aluminum center connector, 2-piece	1
Black housing screws	8
Adjustment screws for center connector	3
Adjustment nuts for center connector	3

## Safety Instructions

- Work on a soft, scratch-free surface.
- Disconnect the devices from mains power and remove all cables before assembly.
- Do not overtighten the screws.
- Ensure that all ventilation openings remain unobstructed.

## Assembly Steps

### 1. Preparation

Place both devices on a soft, clean surface to prevent scratches.

### 2. Mounting the Rack Ears

Each side of the device has two mounting holes. If screws are already installed there, remove them. Then align the rack ears flush with the sides of the devices (as shown in Figures 1 and 2) and fasten them using the supplied housing screws.

### 3. Installing the Center Connector

Position the aluminum center parts on the opposite sides of the housings and fasten them securely.

### 4. Joining the Devices

Align both devices and join them together. Secure the connection from the top using the supplied locking screws.

### 5. Final Inspection

Check that all screws are tight, the front panels are flush, and there are no visible gaps between the devices.
